

A 3D perspective diagram of a rectangular plate. The plate is shown with its top, front, and side surfaces. The side surface is composed of several parallel lines, indicating its thickness. A dimension line with arrows at both ends is drawn along the side surface, labeled with the number 10, representing the thickness of the plate.

This exploded perspective view shows the assembly of the device. It includes a top layer (10) with a bottom surface (18). Below it is a layer (14) with a top surface (15) and a bottom surface (16). This layer (14) contains several circular features (9) and two cross-shaped features (17). A layer (11) with a top surface (13) and a bottom surface (19) is positioned below layer (14). The bottom-most layer is labeled 16. Arrows indicate the relative positions and assembly direction of the layers.
